PROFESSIONAL SUMMARY

Dedicated Offensive Security Specialist & Penetration Tester with 4+ years of intensive hands-on experience and self-directed security research in Web, Network, Active Directory, and Mobile Application Security. Combines extensive real-world enterprise infrastructure administration (Cisco Core/Nexus, Aruba, FortiGate, EDRs) with rigorous threat modeling, vulnerability discovery, and exploit validation. Proven track record in uncovering high-severity vulnerabilities (SQLi, Auth Bypass, IDOR, XXE, Kerberoasting) across complex multi-property enterprise networks and hotel management systems.

PROFESSIONAL EXPERIENCE

Regional Network & Cybersecurity Administrator (Penetration Tester)
SUNRISE Resorts & Cruises | Hurghada, Egypt | Oct 2026 – Present

- Lead authorized Web Application, Network, and Mobile Penetration Testing across all regional properties and digital assets.
- Conduct manual static/dynamic security analysis and vulnerability research to identify business logic flaws, authorization bypasses, and API vulnerabilities.
- Deliver actionable technical remediation guidance to developers and system administrators to harden perimeter security and regional infrastructure.

Cybersecurity & Infrastructure Engineer
Pickalbatros Hotels Group (HQ) | Hurghada, Egypt | May 2026 – Oct 2026

- Conducted enterprise-wide security assessments, configuration reviews, and vulnerability scanning across group-wide HQ infrastructure.
- Hardened complex networking environments including Cisco Nexus Core, Catalyst, Small Business switches, and virtualization platforms.
- Administered Bitdefender GravityZone EDR company-wide, investigating security indicators and reducing attack surfaces across all properties.

IT Supervisor (Promoted from IT Specialist)
SUNRISE Resorts & Cruises | Hurghada, Egypt | Nov 2023 – May 2026

- Promoted from IT Specialist to IT Supervisor in recognition of operational leadership and technical security initiatives.
- Performed internal web application penetration testing on core hotel platforms (Opera Cloud, Fidelio Suite8, SUN, Vision, Material Control, Fatoraty, TravelClick interfaces), uncovering critical SQL Injection, Auth Bypass, and IDOR flaws.
- Managed FortiGate perimeter security, network architecture (Cisco, Aruba, Ruijie), and SentinelOne EDR deployment.

Cybersecurity Analyst (Part-Time)
Confidential Security Client | Remote | 2023 – Present

- Conduct authorized penetration tests covering Web Applications and Active Directory environments (Kerberoasting, privilege escalation, lateral movement).
- Document OWASP Top 10 vulnerabilities (SQLi, Stored XSS, XXE, SSTI, IDOR) with proof-of-concept exploits and remediation steps.

IT Specialist
Armed Forces Engineering Authority | Cairo, Egypt | Oct 2022 – Nov 2023

- Maintained system availability, network operations, and user endpoint troubleshooting.

TECHNICAL SKILLS

Offensive Security: Web Application Penetration Testing, Mobile Security (Android/iOS), Active Directory Security, Network Pen Testing, Source Code Review, Vulnerability Research, Threat Modeling, Red Teaming

Security Tools: Burp Suite Pro, BloodHound, Impacket, Metasploit, SQLMap, Nessus, Nuclei, Wireshark, Frida, MobSF, Mimikatz, Hashcat

Hospitality Systems & Interfaces: Opera Cloud, Fidelio Suite8, SUN Systems, Vision, Material Control, Fatoraty, TravelClick

Networking & Security Infrastructure: Cisco (Nexus Core, Catalyst, Small Business), FortiGate Firewalls, Aruba, Ruijie, SentinelOne EDR, Bitdefender GravityZone, VMware ESXi

Programming & Scripting: Python, Bash, PowerShell

TECHNICAL TRAINING & SELF-STUDY

Intensive hands-on practical self-study and lab practice; not formal exam certifications.

Advanced Web & Mobile Security

- eWPTX – Web Application Penetration Tester eXtreme (Advanced Web Security & Code Review)
- eMAPT – Mobile Application Penetration Testing (Android/iOS Security & Reverse Engineering)
- eWPT – Web Penetration Tester (Practical Web Security & OWASP Top 10)

Infrastructure & Red Teaming

- OSCP – Penetration Testing with Kali Linux (Offensive Security & Network Pen Testing)
- CRTP – Active Directory Security & Red Team Operations
- eJPT – Junior Penetration Tester (Penetration Testing Fundamentals)
- CEH – Ethical Hacking & Vulnerability Assessment Methodologies

EDUCATION & DIPLOMAS

- **System Administration Diploma** | Information Technology Institute (ITI)
- **Bachelor of Computer Science** | Faculty of Computing and Information, Luxor University
